DGNconform

The MicroStation Office Manager

DGNconform is the Automated MicroStation Office Manager providing an easy-to-use and intuitive solution to create, validate and assure DGN file data. A server-base enterprise solution, DGNconform provides users the ability to easily create and maintain drawings to a set standard and significantly reduces time spent reworking and correcting symbology during and at the end of a data capture of design project.

Create DGN files to a standard

- Perform drafting work quicker and more accurately
- Automatically create and design to specification from the beginning of the drafting phase
- Reduce time spent reworking files at end of project
- Drafting menu allows new users to be productive in hours
- Automatic drafting capability applies and sets symbology and command to draw features selected
- Customisable drafting menu enables creation of custom workspaces, increasing efficiency and productivity

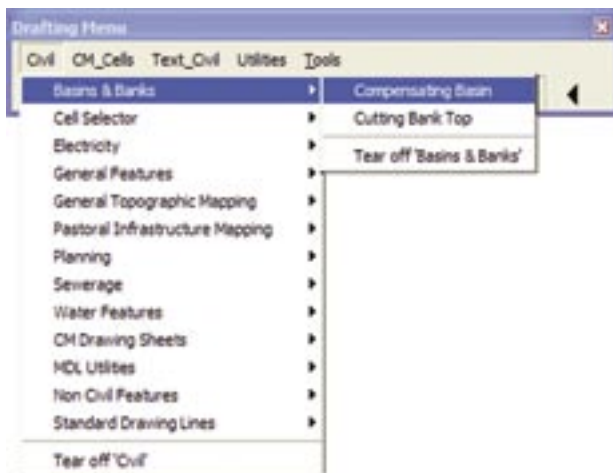

Validate your DGN files

- Easily check and conform DGN files to CADD standards
- Eliminate lengthy labour intensive error checking processes
- Check and conform at the same time, through one dialog box
- Intuitive conforming function provides suggestions and match scores
- Ensure files are 100% error free with one-click
- Ability to quickly add and update dictionaries with new features
- Easy to use point-and-click dialog

Assure data compliance

- Quality assure files with DGNconform
- Place corporate watermark to certify compliance to standard
- Encrypted watermark is secure and is automatically invalidated when file is modified
- Create management reports on DGN files and attached reference files
- Single process batch reporting function
